AMOS Mfg.

BATTERY RECYCLING

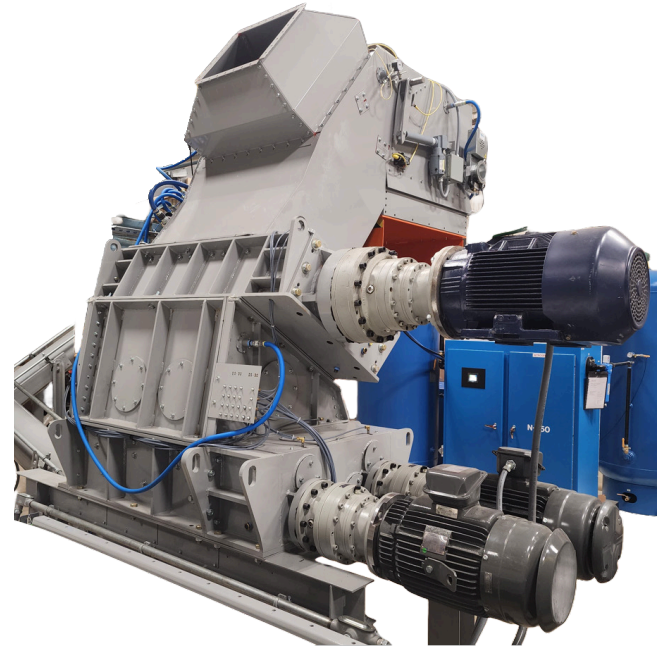

At AMOS Mfg. we provide the processing equipment - shredders, conveyors, separation, screeners, etc. - to liberate and separate the valuable metals from the other battery components. Our battery recycling systems are application specific and engineered based on battery type and throughput volume

AMOS Mfg.'s dual and quad shaft shredders utilize a low-speed, high-torque design that efficiently processes battery materials for downstream separation and recovery.

FEATURES

- Customizable Infeed Equipment
- Primary & Secondary Shredding with Adjustable Output Size
- Inert Shredding & Wet Shredding
- Scalable to Throughput Requirements
- Custom Water Delivery Systems
- Liquid Sealed Enclosures
- Fire Suppression Options & Monitoring
- Integration of Downstream Separation Equipment for Black Mass Recovery

Stacked Dual & Quad Shaft Battery Shredder

EQUIPMENT SOLUTIONS FOR BATTERY RECYCLING
